

DAVID SIDDLER

JUNIOR WEB DEVELOPER

My journey started with taking up learning to code as a hobby. I enjoy the creative and problem-solving aspects of it. Over the past two years I have engulfed myself with online coding courses, books, was accepted and passed an intense 13-week graduate program with Futureproof - La Fosse and completed a 9-week Full-Stack development bootcamp at Le Wagon London. My goal now is to change careers, from a Demand Planning Manager to a role in tech. Besides coding, I am an enthusiastic Ironman triathlete and biltong maker. My current project is building a biltong maker which can control the relative humidity and temperature inside the biltong box using Arduino IDE, an ESP32 controller some other electrical components and Google.

TECH SKILLS

- Javascript
- React
- HTML/CSS
- Material UI
- Python
- Flask
- SQL Alchemy
- Cypress
- Node.js
- Heroku
- Ruby
- Ruby on Rails
- PostgreSQL
- Django
- Bootstrap
- Jest

SOFT SKILLS

- Team player
- Problem solver
- Enthusiastic
- Eager to learn
- Flexible
- Communication

EDUCATION

FUTUREPROOF - LA FOSSE

Trainee
2022

LE WAGON

Full Stack Web Developer
2021

BTECH - INDUSTRIAL ENGINEERING

UNISA (South Africa)
2015-2017 Incomplete

BTECH - BUSINESS MANAGEMENT

CPUT (South Africa)
2002-2005

SUMMARY

I attained a Business Management Degree years ago. Currently a Tech Trainee at futureproof. In my previous role I was a demand planning manager who was responsible for the overall demand and supply of product which required accuracy and attention to detail. I come with a decade of experience in supply-chain and retail for both international and SME businesses.

I have experience in MS: excel and basic VBA(macros), I have managed a team. Work well in teams as well as autonomously to achieve goals.

PORTFOLIO
